

El Terror Invisible Workshop Preventing Exposure to Agricultural Chemical for Promotores

Promotores are recognized as valuable instruments in the delivery of pesticide safety information to migrant farmworkers. In addition to field exposure, there is increased concern regarding pesticide contamination in the home. This 4-hour highly participatory workshop introduces several teaching tools for pesticide safety education and gives promotores the opportunity to exhibit skills and knowledge transfer through group presentations.

Applied experience prepares the promotores to extend pesticide education to farmworkers in their communities. The teaching materials also help participants understand the safety and health issues related to pesticides. The following tools are introduced, discussed and demonstrated in the workshop:

- **El Terror Invisible** video, fact sheets & brochure
- **Nuestra Piel** flip chart
- **Florescent Pesticide Transfer** glo germ powder & black light
- **Siguiendo el Sol** video
- **Pesticide Transfer Mapping**
- **Fotonovelas**

Small groups receive the education tools and are asked to develop pesticide safety presentations, modeling behavior and information received. The groups present their messages to the larger group.

The workshop concludes with a discussion of implementation challenges and successes led by an experienced promotore. Participants learn from shared experiences and have the opportunity to ask questions about message delivery.

In order to build capacity, participants are provided with bi-lingual educational materials. The materials are listed on the back of this page.

The workshop is presented in Spanish and English.

Abbreviated Workshop Agenda

2:00-2:15	Welcome & Introductions
2:15-3:55	Review Resource Materials
3:55-4:00	Break
4:00- 5:00	Small Group Activities
5:00-5:40	Q & A with Experienced Promotora
5:40-6:00	Follow Up Opportunity
6:00	Certificates & Evaluations
